

New Product Introduction

XE Series SDXC Memory Card

Consumer Plus MLC (Multi Level Cell) NAND High Capacity SD Card

Panasonic, a worldwide leader in Storage Media Products, is pleased to introduce the **NEW XE Series High Capacity Consumer Plus microSD Flash Memory Card**. The **XE Series** SD Card at 256GB adopts MLC (Multi Level Cell) NAND flash memory which is more reliable than TLC (Triple Level Cell) NAND flash memory. This High Capacity card allows high speed read and writes and it's proprietary Panasonic Controller and firmware increases write efficiency and card lifetime.

Quality is maintained with 100% product screening before shipment to achieve low failure rate. Available in a 256GB model only.

Features

- MLC (Multi Level Cell) NAND Flash High Capacity Memory
- Panasonic Controller And Firmware
- 100% Product Screening Test
- Available in 256GB Capacity Only
- RoHS/REACH Compliant

Benefits

- High Speed Data Transfer For Moving Large Files
- Proprietary Controller Increases Write Efficiency And Lifetime
- All Cards Are Tested At The Factory To Ensure Quality And Consistency

Industries

- Security Surveillance
- Industrial Automation
- Medical

Applications

- Video Camera
- Police Body Camera
- High Capacity Data Storage
- Patient Data Storage
- Booting Linux Including Data Logging
