

Nomad Flip Jig TOL-14793

The Nomad Flip Jig is a handy accessory for your Nomad 883 Pro that allows you to cut both sides of a part while maintaining perfect alignment. Each one of these jigs is precision machined to mount to the Nomad's table and uses the CNC's built-in machine calibration to make it easy to locate while attached. That means no edge finders are required!

The Flip Jig is made to hold material for milling and fabrication that's just under 3in (~76mm) by 5in (127mm) in size, and up to 1.2in (~30.5mm) thick.

INCLUDES

- 1x Nomad Flip Jig
- 4x Mounting Screws
